COMMERCIAL & INDUSTRIAL

COMMERCIAL & INDUSTRIAL LIGHTING

We have a wide collection of commercial and industrial lighting choices. We recommend out LED lighting panels for projects that are retail and office related. These panels will give you a high lumen brightness output while keeping your energy consumption costs as low as possible.

Our LED batten lighting will also replace your old and outdated halogen tube lights. Without any unnecessary parts and replacements, all you have to do is connect and fit your new light, and you are done.

Our UFO high/low bay lighting will ensure your industrial and warehouse lighting needs are also met. Easy to install lighting that will leave you satisfied with the amount of light dispersed throughout your building.

Emergency lighting is readily available, we have emergency maintained and non maintained options available.

CEILING TILE PANELS

What are LED panels?

Designed to replace conventional fluorescent ceiling lights in commercial buildings and office environments.

LED panels are thin panels which consist of light emitting diodes (LEDs) placed in between aluminium housing and plastic material.

The aluminium housing acts as a support for the LED strips, while also providing a cooling system for the LED lights themselves.

Available in different size options, LED panel lights can be either suspended from the ceiling or mounted directly into the ceiling – usually for rooms with lower-height ceilings.

Browse our range of 600x600mm panels, made from lightweight aluminium housing and more efficient LED diodes.

What are the benefits of LED panels?

If you are looking for a premium lighting solution for your commercial space that will also reduce long-term costs and help the environment, then LED panels are a perfect choice.

LED panel lights provide excellent colour rendering and do not fade, making them perfect for retail and hospitality environments.

They are also fully controllable and can be dimmed depending on the mood you are trying to create.

LED lights are up to 80% more efficient than other alternatives, such as fluorescent or incandescent lights.

With 95% of the energy in LEDs being converted into light, only 5% is wasted as heat, therefore their energy-efficiency is unbeatable.

Providing you buy from a reputable retailer, like LED Panel Store, LED panels offer an exceptionally long lifespan, expected to last up to 50,000 hours before replacements are needed.

With so many compelling reasons to switch, now is a good time to make the investment for a brighter future.

LED PANEL LIGHT WITH WHITE FRAME | 600 X 600MM | ANTI-YELLOWING

Product Features:

- **Bright Panel Lighting** - 7000K Daylight White
- **Powerful Wattage** - 48W LED Panel - High Brightness
