COMMERCIAL & INDUSTRIAL

COMMERCIAL & INDUSTRIAL LIGHTING

We have a wide collection of commercial and industrial lighting choices. We recommend out LED lighting panels for projects that are retail and office related. These panels will give you a high lumen brightness output while keeping your energy consumption costs as low as possible.

Our LED batten lighting will also replace your old and outdated halogen tube lights. Without any unnecessary parts and replacements, all you have to do is connect and fit your new light, and you are done.

Our UFO high/low bay lighting will ensure your industrial and warehouse lighting needs are also met. Easy to install lighting that will leave you satisfied with the amount of light dispersed throughout your building.

Emergency lighting is readily available, we have emergency maintained and non maintained options available.

Why choose Ecobrite?

We are the UK's leading lighting company, innovating with new products and creating truly unique and stylish lighting products for your home or project. Visit one of our dedicated showrooms, with a display of all our new extensive range of products on display, our staff will help you with the process.

PANEL LIGHTING

LED PANEL LIGHTING

Wide range of decorative LED panels. Best sellers include the recessed and surface mounted Ecoslim panels. High lumen brightness panel lighting for any project. The high brightness per wattage is the best in the market, with LED technology that is reliable and efficient.

The panels can be used in office, retail and even domestic uses. They are manufactured to consume as little energy as possible while giving you a high light output.

We supply LED panels that help to create a relaxing ambiance in your office or retail space. The natural tone of the light provides lighting that is easy on the eyes and helps to create a sense of environment.

PANEL LIGHTS

LED PANEL LIGHTS

LED panel lights replace old fluorescent ceiling lights in offices and retail premises. The LED panels are much thinner and emit more lumens, giving you more brightness per wattage compared to an older lighting system.

The panels are placed within aluminium housing and quality plastic materials to ensure that the light runs efficiently as possible.

The aluminium housing helps to keep all the internals together within a lightweight casing which also helps to ensure cooling is achieved and the lights run at an optimal temperature.

We have different options available, in single colour and multi-colour options including new ultra thin panels, recessed and surface mounted models.
